INTRODUCTION

The demand for Statistics on Agriculture is extensive. It is not limited to Governmental Agencies, which require the information to shape and direct policies, or to Commercial institutions, which need data on agricultural production to guide their activities, but farmers, themselves, and those intimately concerned in marketing and processing agricultural products must be informed of the trends in the agricultural industry.

This publication has been prepared to partially meet those demands in so far as Alberta conditions are concerned. It is hoped that as time goes on additional data may be included, and any suggestions which will enhance the value of the booklet will be gladly considered.

ACKNOWLEDGMENT

Data have been obtained from many sources, and acknowledgment is hereby expressed to the Dominion Bureau of Statistics, the Dominion Department of Agriculture, Board of Grain Commissioners, the Meteorological Division, Department of Transport, and the Branches of the Department of Agriculture for information taken from various publications. A special word of appreciation is extended to C. F. Wilson, Chief, Agricultural Branch, Dominion Bureau of Statistics, for helpful suggestions and assistance.

AGRICULTURAL EXTENSION SERVICE, R. M. PUTNAM, Director.
